

**RUSSIA
ARMS EXPO**

Dmitry Medvedev

Prime Minister of the Russian Federation

"These exhibitions get more interesting every year. Our defence industry has witnessed strong growth; we're seeing new models and new technologies emerge which are today creating completely different parameters for conducting military operations. Many types of remote-controlled robotic equipment are being developed, which can be operated without committing human resources, which is no doubt especially important and which to a significant degree is going to define the profile of the Russian armed forces in the 21st century."

Main sections of the exhibition:

Military equipment

Arms

Unmanned aerial vehicles

Ammunition

Self-propelled field, tank, anti-tank and anti-aircraft, naval and airborne artillery weapons

Logistical support equipment and resources

Simulators and technical training resources

Railway troops equipment

EXHIBITION
ORGANIZERS:

THE AIM OF THE EXHIBITION

is to promote Russian military equipment, arms and ammunition on the domestic and foreign markets, to expand the range of foreign partners, to demonstrate the latest achievements of Russian and foreign military equipment manufacturers, and to develop business contacts between manufacturers and purchasers of military equipment, arms and ammunition from all over the world.

Dmitry Rogozin
Deputy Prime Minister
of the Russian Federation

"The exhibition allows us to present a full picture of the capabilities of new Russian arms. We hope that within a short time the Victory Parade will feature only new models, completely new models, created on the basis of specifically Russian science and technology, rather than Soviet products."

Sergei Ryabkov
Deputy Minister of Foreign Affairs

"The RUSSIA ARMS EXPO 2013 exhibition has a great future."

Oleg Sienko
Chief Executive Officer, Uralvagonzavod

"RAE 2013 is an excellent venue not just for business negotiations but also for demonstrating the latest military developments. Moreover, the Nizhny Tagil exhibition offers not just unique but practically unlimited opportunities to demonstrate military equipment. No other world-famous exhibition has such a venue – 52 km long and 7 km wide."

General Patrick Colas des Francs
General Director of the EUROSATORY
international arms exhibition

"The 9th International Exhibition of Arms, Military Equipment, Russia Arms Expo 2013, has demonstrated the great potential of the Russian defence industry and clearly defined the position of Russia as one of the leading players in the global arms market."

Christopher Foss
International expert on armoured vehicles
and ground force weapons, observer
for Jane's Defence Weekly and Jane's
International Defence Review

"Unlike similar exhibitions in the UK and France, you really have the space to show this equipment, its mobility and firepower, which our exhibitions cannot do."
